# Tech Stack

## Machine Learning

Clustering Algorithm

## Frontend

HTML , CSS , Bootstrap , Tailwind

## Designing

Unity,Canva

## Deployment

Netlify,GitHub,Git.

# Clustering

*The Task of grouping data points based on their similarity with each other is called Cluster Analysis.*

*This method is defined as Unsupervised Learning.*

*Here, we are gaining insights from Unlabelled data points.*

# FinTech

The Model uses Technology to meet the Financial Requirements.

AI is used in order to characterize the expenses.

By the use of this ,we'll balance the Financial Cycle.
